LANGUAGES

Go (Golang)
Kotlin
Java
PHP (Laravel)

ANDROID

Jetpack Compose
MVVM / MVI
Clean Architecture
Multi-module
Convention Plugin
Coroutines & Flow
XML Layouts

BACKEND & API

REST API Design
gRPC
WebSocket / SSE
JWT Auth
Microservices
API Gateway

DEVOPS & INFRA

Docker & Compose
Nginx
Redis & RabbitMQ
MQTT
CI/CD Pipelines
VPS Deployment

DATABASES

PostgreSQL
MySQL
SQLite

OTHER

Firebase (Auth, FCM)
Google Maps
NFC
Socket.IO

EDUCATION

B.Sc. Computer Science & Engineering
Daffodil International University

TOOLS

Claude CLI · GitHub Copilot
ChatGPT · Gemini

AVAILABILITY

Open to part-time or contract opportunities
(Go backend / full-stack)

PROFESSIONAL SUMMARY

Senior Software Engineer with **8+ years of Android development** and **4+ years of backend development** using Go and Laravel. Experienced in **end-to-end system ownership** — from gathering requirements and defining system architecture, to database design, API specification, mobile development, and production deployment. Regularly leads technical direction across mobile, backend, and web/admin layers; guides UI/UX designers based on functional requirements; and defines data flow and integration contracts for cross-functional teams.

PROFESSIONAL EXPERIENCE

Senior Software Engineer Mar 2026 – Present
Brain Station 23
—Contributing to Android application development, system architecture discussions, backend API design, and R&D initiatives.

Senior Software Engineer Aug 2024 – Feb 2026
TechnoNext Software Ltd
—Led a project end-to-end — owned requirements, system design decisions, and API analysis; optimized API structure and reduced unnecessary network calls, improving performance measurably.

Senior Programmer Apr 2023 – Jul 2024
Aamra Technologies Limited
—Developed Android POS applications; built and maintained backend REST APIs using Laravel; coordinated API contracts between mobile and backend teams.

Senior Software Engineer Apr 2018 – Mar 2023
Arena Phone BD Ltd
—Designed and shipped multiple Android applications; served as team lead defining project architecture and mentoring junior developers.

SELECTED PROJECTS

GoNStay — OTA Platform Go · Laravel · Docker
Online Travel Agency · Backend Architecture & Android
—Defined system architecture, DB schema, and API contracts for booking and service management; built Go backend with concurrent processing; deployed via Docker on VPS.

Easy POS & Distribution Management Android · Laravel · MySQL
POS & Supply Chain · Full System Design
—Led architecture for POS and distribution workflows — designed DB, API requirements, and data flow across mobile and web admin; guided designer on UI flow; developed Android client.

Hotel Management System Android · Backend · Web Admin
Hospitality · Architecture & Requirements
—Gathered requirements; designed system flow, DB schema, and API specs covering booking, room management, and billing across mobile and web admin panel.

Terminal Management System Laravel · Android · MySQL
POS Infrastructure · Full Ownership — DB, API, Architecture & Mobile
—Owned all technical decisions — designed full DB schema, defined API contracts, and architected the system flow for terminal device and transaction management; developed the Android client end-to-end.

Quiz Hub · LearnStar · SMS Manager Android · Backend
EdTech & Utility · System Design & Development
—Defined architecture, data flow, and API requirements for each platform; guided designer on UX flow; developed Android apps and backend services end-to-end.

Track Your Car · Multiple E-commerce Platforms Android · Go / Laravel · Web
Telematics & Commerce · Full Stack
—Architected vehicle tracking system and multiple e-commerce platforms — defined system flow, DB design, API specs, and mobile-web integration strategy.
